Mohammed Faisal

Software Developer (Full-Stack)

faisalmohammed.se@gmail.com • +91 7994010513 • Kerala, India • Github • LinkedIn • portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with **2+** years of professional experience contributing to production web applications, SaaS platforms, AI-powered solutions, and real-time communication systems. Proficient in **React.js, Next.js, TypeScript, JavaScript, Node.js, Express.js, MongoDB, and PostgreSQL**. Experienced in building responsive user interfaces, integrating REST APIs, implementing secure authentication, and troubleshooting production issues. Adept at collaborating with cross-functional teams in Agile environments to deliver maintainable, reliable, and user-focused software solutions.

TECHNICAL SKILLS

Frontend
- React.js
- Next.js
- TypeScript
- JavaScript (ES6+)
- Tailwind CSS
- Redux Toolkit
- Responsive Web Design

Real-Time Technologies
- Socket.IO
- WebSockets

Development Practices
- Agile / Scrum
- RESTful API Design
- Performance Optimization
- Responsive UI Development
- Clean Code Principles

Backend
- Node.js
- Express.js
- REST API Development
- GraphQL
- JWT Authentication
- Bcrypt
- Joi Validation
- MVC Architecture

AI & Integrations
- AI API Integration
- AI-Powered Application Development
- Cloudinary
- Multer
- Nodemailer

Databases
- MongoDB
- Mongoose
- PostgreSQL
- Database Design
- Aggregation Pipeline

Tools & Platforms
- Git
- GitHub
- Postman
- Figma
- Vercel
- Render

PROFESSIONAL EXPERIENCE

Software Developer (Full-Stack)

Sharaco Technologies | Kerala, India November 2025 – Present

- Contribute to 3 production applications: FlowBee.io, booking.flowbee.io, and Kootaan CSM.
- Maintain and enhance 6+ business modules across 3 production applications, covering Dashboard, Booking Management, Calendar, Reports, User Management, and Chat.
- Create 11+ reusable React.js components to promote consistent UI patterns and reduce duplicated component code.
- Integrate 6+ backend REST API endpoints to connect frontend modules with business data and workflows.
- Resolve 6+ production bugs across Booking Management and Dashboard, helping maintain application reliability.

Full-Stack Developer

Bridgeon | Kerala, India September 2024 – October 2025

- Produced 2 full-stack applications: an AI-powered learning platform and a real-time chat application.
- Crafted responsive interfaces using React.js, Next.js, TypeScript, and Tailwind CSS.
- Created REST and GraphQL APIs for authentication, user management, scheduling, and application workflows.
- Utilized Node.js, Express.js, MongoDB, Mongoose, and PostgreSQL for backend functionality.
- Secured application workflows using JWT authentication, bcrypt password hashing, and Joi validation within an MVC architecture.
- Enabled real-time communication through Socket.IO and WebSockets.
- Connected Cloudinary, Multer, Nodemailer, and AI APIs to extend application functionality.
- Tested application features, investigated defects, and contributed to code reviews to improve software quality.

PROJECT EXPERIENCE

SkillMentorX – AI-Powered Mentor–Student Platform
Tech Stack: Next.js, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, GraphQL, Redux Toolkit, Socket.IO

- Created an AI-assisted learning platform supporting mentor and student workflows.
- Structured separate dashboards for mentors and students using Next.js, TypeScript, and Redux Toolkit.
- Organized backend data models using MongoDB and PostgreSQL.
- Secured account access through email/password and OTP authentication.
- Delivered 12+ REST and GraphQL APIs for user management, scheduling, mentor matching, and course management.
- Enabled real-time chat, notifications, and live mentoring using Socket.IO.
- Integrated an AI-powered chatbot to assist learners with platform interactions.

Real-Time Chat Application
Tech Stack: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Socket.IO

- Created a full-stack messaging application with role-based authentication.
- Enabled real-time messaging, typing indicators, notifications, and media sharing through Socket.IO.
- Developed REST endpoints for user management and chat message persistence.
- Connected Cloudinary and Multer to support media uploads.
- Managed client-side state using Redux Toolkit to maintain consistent messaging workflows..

EDUCATION

Professional Software Development Training (Full-Stack / MERN)

Bridgeon Skillversity | Kerala, India | 2024–2025

- Completed intensive training in full-stack web development, covering React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, and GraphQL.
- Practiced building full-stack applications involving REST APIs, authentication, real-time communication, and AI integrations.

LANGUAGES

- English – Professional Working Proficiency
- Malayalam – Native Proficiency
